SOLUTION_10th CBSE(BOARD)_SUMMATIVE ASSESSMENT-II_MATHS_PAGE #6

[Tangent at any point of a circle is perp. to radius through the point of contact] AO = AO [Common]

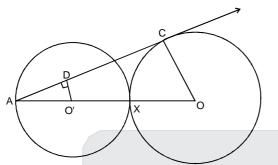

Steps of constructions are as follows

(1) Draw a circle of radius 4 cm

(2) Let O be its centre and P be any external point such that OP = 8 cm

(3) Join OP and then taking OP as diameter draw a circle intersecting the given circle at two points A and B. Join AP and BP.

(4) Hence, AP and BP are the required tangents

$$\Rightarrow \frac{\mathrm{DO'}}{\mathrm{CO}} = \frac{\mathrm{AO'}}{\mathrm{AO}} = \frac{\mathrm{r}}{\mathrm{3r}} = \frac{1}{3}$$
